EXPLANATORY NOTES

1. The products subject to the various restrictions are shown in the list, and arranged by their respective BTN numbers.
2. The United States have indicated an interest in all items listed.
3. Type of restrictions: the following symbols are used in the list.

GDK      imported within framework of global foreign exchange quota - that is purchased with foreign exchange allocations from Federal funds or purchasers own resources (e.g. retention quotas).

RK      imports under commodity quota.

LB      liberalized.

D      import licence required.

DL      import licence.

1/      effective 20 June 1968, the Federal Secretariat for Foreign Trade is issuing special accordances for the importation of these goods - these accordances will complement, not replace, the existing system for obtaining foreign exchange. Thus after getting the accordance, the importer must then meet the requirements of the foreign exchange category governing the item. Issuance of the accordance does not constitute permission to buy foreign exchange.
