Group "Sector Approach"

INFORMATION ON ORES AND METALS

Addendum

Part IV. Nickel

- IV.1 - Importance of selected countries in world exports of nickel, percentages based on quantities in 1971 and 1972.
- IV.2 - Share of nickel in total exports of selected countries, percentages based on values in 1971 and 1972.
- IV.3 - Ratio of nickel imports to production in selected countries, 1971 and 1972.
- IV.4 - Production and net trade in nickel ores and concentrates, unwrought metal and semi-manufactures in the tariff study countries and other major exporting countries, quantities for selected years between 1963-73.
- IV.5 - Volume and value of imports and/or exports of nickel, selected countries, by processing stages, 1971 and 1972.
- IV.6 - Value of imports of nickel into the Tariff Study countries by processing stages categories distinguishing principal m.f.n. and GSP suppliers and level of m.f.n. duties, 1971.
- IV.7 - Value of imports of nickel into the tariff study countries from m.f.n., GSP and other preferential origins by BTN headings, and the corresponding m.f.n. tariff averages, 1971.

Notes: The data for production and trade in ores and concentrates are in nickel content, those for metal and semi-manufactures in actual weight of the product. Production of unwrought nickel refers to primary nickel and nickel contained in ferronickel, nickel oxide sinter and monel metal smelted directly from ores; data for ores include mattes./Les données relatives à la production et au commerce des minerais et des concentrés s'entendent du contenu de nickel, celles relatives au métal et aux demi-produits, au poids réel. La production de nickel brut s'entend du nickel de première fusion et du nickel contenu dans le ferronickel, dans l'oxyde de nickel, dans le sinter et le monel obtenus directement par fusion à partir des minerais. Les données relatives aux minerais comprennent les mattes.

^aImports of ores and concentrates include scrap./Les importations de minerais et de concentrés comprennent le métal de récupération.

^bNi content of imported ores and concentrates estimated on the basis of the trading partner's returns./Teneur en nickel des minerais et concentrés importés estimée sur la base des statistiques des partenaires commerciaux.

^cNi content of exported ores and concentrates estimated on the basis of the trading partner's returns./Teneur en nickel des minerais et des concentrés exportés estimée sur la base des statistiques des partenaires commerciaux.

^dThe figures for ores and concentrates refer to nickel oxide and sulphur nickel, those for metal to sinter; ores and concentrates and metal include cobalt./Les chiffres des minerais et concentrés s'entendent de l'oxyde de nickel et du sulfure de nickel, ceux relatifs au métal, du sinter. Les minerais et concentrés et le métal comprennent du cobalt.

^eOres and concentrates including matte. The figures for unwrought metal refer to ferro-nickel./Minerais et concentrés, y compris les mattes. Les chiffres relatifs au métal brut s'entendent du ferronickel.

Table IV.6

Value of imports of nickel into the Tariff Study countries
by processing stages categories distinguishing
principal m.f.n. and GSP suppliers and
level of m.f.n. duties, 1971

Apart from the adjustments mentioned in the general note, the presentation of this table is the same as that published in the Basic Documentation for the Tariff Study: Imports by Industrial Product Categories, Principal Suppliers and Level of Duty. It shows imports of nickel, broken down according to the following stages of processing: nickel, ores and concentrates ("ores/minerais", BTN No. EX 26.01 and EX 26.03), unwrought nickel ("metal unwr./brut", BTN No. 75.01) and nickel semi-manufactures ("metal prods.", BTN No. 75.02-05).

The first three stubs of the table show, for each stage of processing, total imports (m.f.n., preferential and other) into each of the Tariff Study countries (see column headings) and into the eleven markets combined ("11 Tariffs"), distinguishing between imports from developed countries (DDC/DEV), imports from developing countries (DGC/PVD) and from countries in the Eastern trading area (ETA/EST).

In the subsequent stubs, the table distinguishes the following trade flows, broken down according to the level of m.f.n. duty¹ (1st column):

- (i) total imports of m.f.n. origin (including imports from countries entitled to the GSP);
- (ii) the network of m.f.n. trade among the Tariff Study countries;
- (iii) imports from other principal suppliers listed in decreasing order of importance.

Since only imports of m.f.n. origin are reported, intra-Community (EC) trade, trade between the EC and the EFTA countries as well as trade under other free-trade area of preferential agreements do not appear in this table; this applies even to products which do not enjoy the free-trade area or preferential treatment.

Tariff and trade data are based on the Tariff Study documentation. The m.f.n. duties considered are those generally in force as of 1 January 1973. The trade figures are expressed in thousands of United States dollars and refer to the year 1971 except for Australia (1971/72) and New Zealand (1970/71). For more detailed definitions and sources, see introductory notes to the Tariff Study publication mentioned above. Since import data for ores and residues (BTN headings EX 26.01 and EX 26.03) are not always reported separately for each metal in the Tariff Study documentation, adjustments had to be made on the basis of available data and the figures shown may be incomplete.

¹Only those duty ranges carrying import values are reported. For the detailed information on duties applicable in this category, see I.5.

Table IV.7

Value of imports of nickel into the Tariff Study countries from m.f.n., GSP and other preferential origins by BTN headings, and the corresponding m.f.n. tariff averages, 1971

The data shown in this table are derived from the Basic Documentation for the Tariff Study: Summary by BTN Headings. However, for the purpose of this study, imports from both m.f.n. and preferential origins were further sub-divided to distinguish imports originating in countries entitled to the Generalized System of Preferences. Apart from the adjustments mentioned in the general note, the definitions of m.f.n. and preferential trade are the same as in the Basic Documentation. The GSP information reflects the most recent situation.

Tariff and trade data are based on the Tariff Study documentation. The m.f.n. duties considered are those generally in force as of 1 January 1973. The trade figures are expressed in thousands of United States dollars and refer to the year 1971 except for Australia (1971/72) and New Zealand (1970/71). For more detailed definitions and sources, or averaging procedures, see introductory notes to the Tariff Study publication mentioned above.

For each metal the BTN headings are shown in the sequence of the stages of processing. For each BTN heading the table shows, for the Tariff Study countries, separately (see column headings) and as a whole ("all tariffs"), the simple (first line) and weighted (second line) tariff averages calculated on all m.f.n. tariff lines within the heading.

On the subsequent lines the table shows import values in thousands of United States dollars. The third line of the table ("Total" row "T") shows imports from all origins (m.f.n., preferential and other). On the subsequent four stubs, the following trade flows are distinguished wherever applicable:

- (i) m.f.n. imports originating in countries (whether developed or in the Eastern trading area) not entitled to the GSP ("m.f.n. origin-DDC") entering under:
 - m.f.n. duty-free lines (row "A")
 - m.f.n. dutiable lines (row "B");

- (ii) m.f.n. imports originating in countries entitled to the GSP ("m.f.n. origin-GSP") entering under:
 - m.f.n. duty-free lines (row "A")
 - m.f.n. dutiable lines and enjoying preference under the GSP ("covered" row "B")
 - m.f.n. dutiable lines and not covered by the respective GSP schemes ("not covered" row "B");

- (iii) imports originating in countries both entitled to the GSP and signatory to a free-trade area or preferential agreement ("orig.pref./GSP"), entering under:
- m.f.n. duty-free lines (row "A")
 - m.f.n. dutiable lines and enjoying preference either under the GSP or under a free-trade area or preferential agreement ("covered" row "B")
 - m.f.n. dutiable lines and not enjoying any preference ("not covered" row "B"); and finally,
- (iv) imports originating in countries not entitled to GSP but signatory to a free-trade area or preferential agreement ("FTA and other pref. orig."), entering under:
- m.f.n. duty-free lines and covered in the relevant agreement ("covered" row "A").
 - m.f.n. dutiable lines and enjoying preference under the relevant agreement ("covered" row "B")
 - m.f.n. duty-free lines and not covered in the agreement ("not covered" row "A")
 - m.f.n. dutiable lines and not enjoying any preference ("not covered" row "B").

In general, the tariff average is reported as 0.0 only if all tariff lines in the BTN heading are duty free; the weighted average for a BTN heading, carrying no trade but including dutiable lines is shown as 0*.

Since import data for ores and residues (BTN headings 26.01 and 26.03) are not always reported separately for each metal in the Tariff Study documentation, adjustments had to be made on the basis of available data. Where import figures for one country could not be collected separately the corresponding column was left blank.

It should also be noted that the benefits of the GSP are generally granted under certain conditions which cannot be reflected in the tabulations. For instance it had to be assumed that all imports originating in countries benefiting from the GSP fully comply with the rules of origin. It has furthermore been impossible to determine the volume of trade which is admitted under tariff lines partly covered in the GSP schemes, or subject to tariff quotas, ceilings or other limitations; consequently all imports in such cases are reported combined.

Finally it should be noted that differences between total imports shown in these tabulations and totals reported in the Basic Documentation for the Tariff Study are due to rounding and, in a few cases, to revisions of the earlier data.
