

GENERAL AGREEMENT ON TARIFFS AND TRADE

RESTRICTED

MTN/SEC/W/1/Add.11

13 June 1975

Special Distribution

Multilateral Trade Negotiations

Group "Sector Approach"

INFORMATION ON ORES AND METALS

Addendum

Part IX. Tin

- IX.1 - Importance of selected countries in world exports of tin, percentages based on quantities in 1971 and 1972.
- IX.2 - Share of tin in total exports of selected countries, percentages based on values in 1971 and 1972.
- IX.3 - Ratio of tin imports to production in selected countries, 1971 and 1972.
- IX.4 - Production and net trade in ores and concentrates and unwrought metals in the Tariff Study countries and other major exporting countries, quantities for selected years between 1963-1973.
- IX.5 - Volume and value of imports and/or exports of tin, selected countries, by processing stages, 1971 and 1972.
- IX.6 - Value of imports of tin into the Tariff Study countries by processing stages categories distinguishing principal m.f.n. and GSP suppliers and level of m.f.n. duties, 1971.
- IX.7 - Value of imports of tin into the Tariff Study countries from m.f.n., GSP and other preferential origins by BTN headings, and the corresponding m.f.n. tariff averages, 1971.

(+) Export surplus/Solde exportateur

(-) Import surplus/Solde importateur

Note: Production and trade of ores and concentrates is in general expressed in analysed tin content, that of metal and semi-manufactures in actual weight of product. Production of unwrought tin is, where applicable, reported separately for primary and secondary metal, trade refers to both. Primary production refers to unwrought tin in metallic form refined from tin concentrates or from mixed concentrates. Production of secondary tin includes metal recovered from tinplate scrap or tin scrap, the tin content of unwrought tin alloys produced from tin scrap; the tin content of scrap materials used directly by companies fabricating tin products or tin-in-products./La production et le commerce des minerais et des concentrés sont en général exprimés en contenu d'étain, déterminé par analyse, et, dans le cas du métal et des demi-produits, en poids réel. Le cas échéant, la production d'étain de première fusion et celle d'étain de deuxième fusion sont indiquées séparément dans la production d'étain brut. Le commerce englobe les deux à la fois. La production d'étain de première fusion s'entend de l'étain brut sous forme de métal affiné à partir de concentrés d'étain ou de concentrés mélangés. La production d'étain de deuxième fusion comprend le métal obtenu par la récupération de fer-blanc ou de vieil étain, d'étain contenu dans des alliages bruts obtenus à partir d'étain récupéré, et d'étain extrait de matières de récupération utilisées directement par des entreprises fabriquant des produits en étain ou contenant de l'étain.

Table IX.6

VALUE OF IMPORTS OF TIN INTO THE TARIFF STUDY COUNTRIES BY
PROCESSING STAGES CATEGORIES DISTINGUISHING PRINCIPAL MOST-
FAVOURED-NATION AND GSP SUPPLIERS AND LEVEL OF MOST-FAVOURED-
NATION DUTIES, 1971

Apart from the adjustments mentioned in the general note, the presentation of this table is the same as that published in the Basic Documentation for the Tariff Study: Imports by Industrial Product Categories, Principal Suppliers and Level of Duty. It shows imports of tin, broken down according to the following stages of processing: tin, ores and concentrates ("ores/minerals", BTN No. ex 26.01 and ex 26.03), unwrought tin ("metal unwr./brut", BTN No. 80.01) and tin semi-manufactures ("metal prods.", BTN No. 80.02-05).

The first three stubs of the table show for each stage of processing, total imports (most-favoured-nation, preferential and other) into each of the Tariff Study countries (see column headings) and into the eleven markets combined ("11 Tariffs"), distinguishing between imports from developed countries (DDC/DEV), imports from developing countries (DGC/PVD) and from countries in the Eastern trading area (ETA/EST).

In the subsequent stubs, the table distinguishes the following trade flows, broken down according to the level of most-favoured-nation duty¹ (1st column):

- (i) total imports of most-favoured-nation origin (including imports from countries entitled to the GSP);
- (ii) the network of most-favoured-nation trade among the Tariff Study countries;
- (iii) imports from other principal suppliers listed in decreasing order of importance.

Since only imports of most-favoured-nation origin are reported, intra-community (EC) trade, trade between the EC and the EFTA countries as well as trade under other free-trade area or preferential agreements do not appear in this table; this applies even to products which do not enjoy the free-trade area or preferential treatment.

¹Only those duty ranges carrying import values are reported. For the detailed information on duties applicable in this category, see I.5.

Tariff and trade data are based on the Tariff Study documentation. The most-favoured-nation duties considered are those generally in force as of 1 January 1973. The trade figures are expressed in thousands of US dollars and refer to the year 1971 except for Australia (1971/72) and New Zealand (1970/71). For more detailed definitions and sources, see introductory notes to the Tariff Study publication mentioned above. Since import data for ores and residues (BTN headings ex 26.01 and ex 26.03) are not always reported separately for each metal in the Tariff Study documentation, adjustments had to be made on the basis of available data and the figures shown may be incomplete.

Table IX.7

Value of imports of tin into the Tariff Study countries from m.f.n.,
GSP and other preferential origins by BTN headings, and the corresponding
m.f.n. tariff averages, 1971

The data shown in this table are derived from the Basic Documentation for the Tariff Study: Summary by BTN Headings. However, for the purpose of this study, imports from both m.f.n. and preferential origins were further sub-divided to distinguish imports originating in countries entitled to the Generalized System of Preferences. Apart from the adjustments mentioned in the general note, the definitions of m.f.n. and preferential trade are the same as in the Basic Documentation. The GSP information reflects the most recent situation.

Tariff and trade data are based on the Tariff Study documentation. The m.f.n. duties considered are those generally in force as of 1 January 1973. The trade figures are expressed in thousands of United States dollars and refer to the year 1971 except for Australia (1971/72) and New Zealand (1970/71). For more detailed definitions and sources, or averaging procedures, see introductory notes to the Tariff Study publication mentioned above.

For each metal the BTN headings are shown in the sequence of the stages of processing. For each BTN heading the table shows, for the Tariff Study countries, separately (see column headings) and as a whole ("all tariffs"), the simple (first line) and weighted (second line) tariff averages calculated on all m.f.n. tariff lines within the heading.

On the subsequent lines the table shows import values in thousands of United States dollars. The third line of the table ("Total" row "T") shows imports from all origins (m.f.n., preferential and other). On the subsequent four stubs, the following trade flows are distinguished wherever applicable:

- (i) m.f.n. imports originating in countries (whether developed or in the Eastern trading area) not entitled to the GSP ("m.f.n. origin-DDC") entering under:
 - m.f.n. duty-free lines (row "A")
 - m.f.n. dutiable lines (row "B");

- (ii) m.f.n. imports originating in countries entitled to the GSP ("m.f.n. origin-GSP") entering under:
 - m.f.n. duty-free lines (row "A")
 - m.f.n. dutiable lines and enjoying preference under the GSP ("covered" row "B")
 - m.f.n. dutiable lines and not covered by the respective GSP schemes ("not covered" row "B");

- (iii) imports originating in countries both entitled to the GSP and signatory to a free-trade area or preferential agreement ("orig.pref./GSP"), entering under:
- m.f.n. duty-free lines (row "A")
 - m.f.n. dutiable lines and enjoying preference either under the GSP or under a free-trade area or preferential agreement ("covered" row "B")
 - m.f.n. dutiable lines and not enjoying any preference ("not covered" row "B"); and finally,
- (iv) imports originating in countries not entitled to GSP but signatory to a free-trade area or preferential agreement ("FTA and other pref. orig."), entering under:
- m.f.n. duty-free lines and covered in the relevant agreement ("covered" row "A").
 - m.f.n. dutiable lines and enjoying preference under the relevant agreement ("covered" row "B")
 - m.f.n. duty-free lines and not covered in the agreement ("not covered" row "A")
 - m.f.n. dutiable lines and not enjoying any preference ("not covered" row "B").

In general, the tariff average is reported as 0.0 only if all tariff lines in the BTN heading are duty free; the weighted average for a BTN heading, carrying no trade but including dutiable lines is shown as 0*.

Since import data for ores and residues (BTN headings 26.01 and 26.03) are not always reported separately for each metal in the Tariff Study documentation, adjustments had to be made on the basis of available data. Where import figures for one country could not be collected separately the corresponding column was left blank.

It should also be noted that the benefits of the GSP are generally granted under certain conditions which cannot be reflected in the tabulations. For instance it had to be assumed that all imports originating in countries benefiting from the GSP fully comply with the rules of origin. It has furthermore been impossible to determine the volume of trade which is admitted under tariff lines partly covered in the GSP schemes, or subject to tariff quotas, ceilings or other limitations; consequently all imports in such cases are reported combined.

Finally it should be noted that differences between total imports shown in these tabulations and totals reported in the Basic Documentation for the Tariff Study are due to rounding and, in a few cases, to revisions of the earlier data.
