Explanatory Notes

As of mid-1987, the latest tariff-related trade flow data which are generally available for developed countries are those in the GATT Tariff Study files for 1984. The secretariat has extracted from the files such data as in the attached tabulations which have been considered useful for Uruguay Round negotiations. These data are presented according to tariff classifications used before the adoption of the Harmonized System. For each pre-HS tariff item, the secretariat has added corresponding new HS-based tariff item number(s) and tariff rate(s) to the extent relevant to the products under study. It is expected that these additional data will help identify broadly, if not precisely, major suppliers and the amount of trade involved with respect to new HS-based tariff items.

The second line of data

HS code number (six digits), sub-position number (seven to nine digits) and MFN rate are indicated in this line. GSP rate is indicated only if it is different from the GSP rate shown in the column TYPE OF DUTY, e.g. GSP 88 5.0 = GSP rate in 1988 is 5.0 per cent.

Column TYPE OF DUTY

MTN-B: MFN rate before the Tokyo Round  
 MTN-F: MFN rate after the Tokyo Round  
 MFN 84: MFN rate applied in 1984  
 GSP: GSP rate in 1984 (1985 for Austria, Finland, Japan and Norway) or GSP rate when Tokyo Round final concession rate has been implemented (Austria, Canada, Japan and Switzerland in certain cases)  
 LDC: Rate applying to least-developed countries in 1984  
 TEMP: Temporary rates applied in 1984  
 FTA: Rate applying to parties to free-trade area arrangement  
 ZONE: Rate applying to parties to inter-zone free trade agreement (e.g. between EEC and EFTA)  
 PREF: Rates applicable under other preferential arrangements, e.g. ACP and certain Mediterranean countries for EEC

Column RATE

Ad valorem rate or ad valorem incidence of specific, mixed or compound rate is indicated with one decimal point. For example, if symbol "S" appears in column "NAT", the rate is ad valorem incidence of a specific rate. Ad valorem incidence is based on imports in 1984.

Column NAT = nature of duty rate (blank for ad valorem rate)

S for specific rate (e.g. \$4.00/kg.);  
 C for compound rate (e.g. \$4.00/kg. + 10%);  
 M for mixed rate (e.g. \$4.00/kg. or 10%, whichever is greater);  
 V for variable levy or variable component;  
 O for other natures.

Column BDG = binding status (blank for ordinary binding)

- C for ceiling binding;  
P for a rate partially bound at a ceiling rate, and partially at the prevailing rate;  
U for an unbound rate.

Column LIM = limitation code for GSP (blank for no limitation)

- C for ceiling limitations for GSP application;  
Q for quota or other fixed quantity limitations for GSP application;  
X for country exclusions for GSP application.

Columns relating to IMPORTS

IMPORTS in 1984 FROM (i) WORLD (= all sources), and (ii) GSP beneficiaries as of 1986 are each sub-divided by TOT (= total imports irrespective of tariff treatment), MFN (= imports entitled to MFN treatment), GSP (imports covered by GSP), LDC (imports entitled to least-developed country preference) and FTA, ZONE, PREF (= imports entitled to free-trade area, inter-zone or other preferential agreements). It may be noted that "imports covered by GSP" do not take into account quantitative and origin rule limitations and non-utilization of GSP and that imports actually benefited from GSP are smaller than imports recorded under GSP.

% SHARE indicates percentage share of GSP beneficiaries in total imports. Other figures indicate the value of imports in US\$1,000.

The last column MAIN SUPPLIERS lists the names of the five main suppliers among all sources and for each tariff treatment. In addition, the bottom section shows the value of imports from four main suppliers among all sources, MFN sources and GSP sources, respectively.

EEC data

While the EEC has been enlarged to include Portugal and Spain since 1986, import data for the EEC(12) are only available separately for the Community of ten member countries, Portugal and Spain. Data for the EEC(10) are followed by those of Portugal and Spain.

- |             |  |
|-------------|--|
| No.         | for tariff number of Portugal or Spain before accession to the EEC |
| former rate | for MFN rate before accession to the EEC                           |
| EC rate     | for EEC's common external tariff rate                              |
| Imports     | for total imports excluding imports from EEC members, in 1984      |
