1. Export aid

As already indicated in the Spanish reply to questionnaire COM.AG/9, Spain does not grant export aid either directly or indirectly, except for wheat in those years when the harvest is such as to produce surplus over and above the reserves necessary for ensuring domestic consumption.

2. Export credits

No export credits exist for agricultural products.

3. Incidence of tariffs, regulating duties and other measures applying to imports

Since retail prices include total costs and trade profits, it is not possible to calculate the incidence in question in view of the complexity of the calculation involved and the fact that it is almost impossible to do.

The aforementioned reply already reported customs and regulating duties. The former, customs duties, have not changed so only the latter will be brought up to date and, for the week of 23 to 30 October, were as follows:
