IMPORT MEASURES

Quantitative Restrictions Applied by Countries Other
than Those Covered by the Joint Working Group

GREECE

Revision

Note: The notifications concerning BTN 10.02 and 24.01 have been deleted. This document replaces pages 109 to 125 of document COM.AG/W/68/Add.2/Part 2.

Explanatory Notes

1. The products subject to the various restrictions are shown in the list, and arranged by their respective BTN numbers.
2. The United States have indicated an interest in BTN numbers 04.05, 07.01, 07.05, 08.01-08.13, 10.01, 10.03, 10.04, 10.05, 10.06, 10.07, 11.01, 12.01, 13.01, 13.02, 17.01, 20.02, 23.04.

3. Type of restrictions

L - Subject to an import licence issued by the Special Committee established under the Foreign Trade Board. Import licences are issued automatically for most of these products when imported from the convertible currency countries.¹

R - Restriction (unspecified)

BQ (EEC) - Quotas for imports from the European Economic Community. These quotas are increased periodically. All quantitative restrictions on imports from the European Economic Community must be abolished not later than twenty-two years as from the entry into force of the Agreement.

¹All imports are subject to an administrative procedure of registration and to control regulations designed to furnish data on receipts and expenditures of foreign exchange and on external financial commitments. Imports are limited to a level compatible to some extent with the country's external resources by means of monetary policy, credit policy and in particular, by regulations governing methods of payment for imports. Imports are generally admitted under two procedures:

Procedure "E": Import permits are issued automatically by authorized commercial banks. This procedure applies:

- (1) to imports from countries participating in the European Monetary Agreement, settlement being effected in accordance with the provisions of that Agreement;
- (2) to countries not participating in the European Monetary Agreement, but with which bilateral agreements are in force (Bulgaria, Brazil, Czechoslovakia, Egypt, German Democratic Republic, Hungary, Poland, Romania, USSR, Yugoslavia), provided settlement is effected through clearing arrangements;
- (3) imports from Canada, the United States and their dependent territories, with the exception of imports paid for out of United States assistance funds.

Procedure "D": Import permits are issued by the Bank of Greece. This procedure relates to imports of products from countries other than those covered by Procedure "E". It is also applicable where the method of payment is not that provided for under Procedure "E". Procedure "D" also applies to imports paid for out of United States assistance funds and certain imports for the account of the State, or by public services, or by the Agricultural Bank of Greece.

According to their source, products listed under L are subject to one of these procedures.

4. Comments

The United States indicated that the issuance of import licences was wholly at the discretion of the Ministry of Commerce or, in the case of rice, of the Ministry of Trade and Agriculture and that the licensing requirement was applied liberally for many products.
